Why not use the INTERNET? There is a wealth of information just waiting to be tapped.

Why not get a job and earn MONEY? You'll find it rewarding.

Stop looking in the mirror so much. There's so much else to be seen.

Why not listen to MUSIC every once in a while?

Why not LET YOURSELF be happy? Emotion can make all the difference.

**WELCOME
TO NOW**

It's Here. The Present.

Life.

Since the dawn of man, many lives have come and gone. And each of these lives, for better or worse, has brought us closer to what we now call the present.

Christopher Columbus voyaged around the world, eventually finding America, and from that came the FIFTY states.

Thomas Edison discovered electricity, which is now used daily.

And Jimi Hendrix played the electric guitar so well that many guitarists today COPY his moves!

But AT THE SAME TIME we FORGET all the evils that present themselves.

We have fought SEVERAL WORLD WARS that have claimed the lives of COUNTLESS MILLIONS.

DISEASES have PLAGUED us from the dawn of man, from the black plague to AIDS.

We have even MELTED AWAY a part of the earth and are currently facing the epidemic of GLOBAL WARMING.

We don't need to dwell on the bad or good.

“Those who recognize a greater force live longer and more prosperously. Accept the ability to be great, to breathe great, and to strive towards greatness.”
(Andrew 3:1)

Making SMALL CHANGES in your daily life can make all the difference.
